DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP08-429-000]

Kern River Gas Transmission Company; Notice of Availability of the Environmental Assessment for the Proposed 2010 Expansion Project

November 24, 2008.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) on the natural gas transmission facilities proposed by Kern River Gas Transmission Company (Kern River) in the above-referenced docket.

The EA was prepared to satisfy the requirements of the National Environmental Policy Act of 1969 (NEPA). The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The EA assesses the potential environmental effects of the construction and operation of Kern River's proposed 2010 Expansion Project. The 2010 Expansion Project would consist of: (a) Installing one new Solar Titan 130 (ISO-rated 20,500-horsepower) gas-driven compressor unit and restaging five compressor units at the existing Muddy Creek Compressor Station in Lincoln County, Wyoming; (b) restaging two compressor units at the existing Painter Compressor Station in Uinta County, Wyoming; and (c) installing additional metering facilities at the Opal Meter Station in Lincoln County, Wyoming and at the Kramer Junction Meter Station in San Bernardino County, California. In
